

GOLDEN MILE MARINE LIMITED

Thynne Road Morningside Q 4170

14th September, 1988

Brian Gagen,
Polyflex Marine Couplings,
16 Crestfield Street,
ZILLMERE, QLD. 4034.

Dear Brian,

This is just a short note to give you some feedback on your product. As you are aware we have Polyflex Couplings fitted to six of our vessels and because of their drive systems the total is 29 Polyflex Couplings.

Recently our 24 ton Aluminium Catamaran ferry "City of Brisbane" was on charter with the Lord Major on board when as fate has it a huge semi submerged log ran under the port hull hitting the propeller.

Inspecting the engine room we found that the Polyflex Coupling 2206 had done its job by seperating itself from the Coupling.

We believe that this has saved us possible gearbox repairs and certainly major repairs to propellor, shaft and skeg strut.

Some of our vessels now have over 3000 hours on their gearboxes with most having between 250 to 350 movements per day.

We understand that a Polyflex Rudder bearing is underway if so could we be supplied some specifications at your earliest convenience.

Yours faithfully,

RUSS BEHAN
MANAGER
GOLEBY & BAIN.
